

## *Cabinet mounted dental unit*

### *Planmeca Compact t*

Planmeca Compact t is an ergonomic option for the dentist and the nurse, and additionally it takes into consideration the patient's comfort in treatment situation. The rear delivery with independent positioning of the dentist console and suction holder enhances the user's ergonomics. With the delivery arm mounted in the cabinet, the instrumentation is kept out of the direct view of the patient.

#### PRODUCT FEATURES

#### Intelligent instrument delivery

- The instrument delivery and suction are at the 12 o'clock position, which maximises the space around the patient chair.
- The instrument console has a practical handle, and can be equipped with up to five instruments.
- All instrument hoses are equipped with Plug & Perform quick connectors. New instruments can be added by simply upgrading the dental unit software.
